## The Circulation of The Bulletin.

The Bulletin has the largest circulation of any paper in Eastern Connecticut, and from three to four times larger than that of any in Norwich. It is delivered to over 3,000 of the 4,053 houses in Norwich, and read by ninety-three per cent. of the people. In Windham it is delivered to over 900 houses, in Putnam and Danielson to over 1,100, and in all of these places it is considered the local daily.

Eastern Connecticut has forty-nine towns, one hundred and eighty-two office districts and forty-one rural free delivery routes.

The Bulletin is sold in every town and on all of the R. F. D. routes in Eastern Connecticut.

CIRCULATION	
1901, average	4,412
1905, average	5,920
1906, average	6,559
1907, average	7,179
1908, average	7,543
Sept. 4, 1909	7,767

## THE BULLETIN'S ILLUSTRATED BOOK.

It is not surprising that a great deal of interest is felt in the pictures which are to be a feature of the 250th anniversary Jubilee book—what they are to be and what they are to represent. Portraits of the officers and chairmen of committees and the guests of the city will number a score or two and then there will be photographs of the decorated streets, the parade, the performances and objects of special interest. It is expected, will make about 50 pages. Where there are large assemblages of people the pictures will be made large enough to make the identification of citizens possible. There are quite a number of these photographs which will be given a full page.

It is the purpose of The Bulletin to make this book so attractive that it will be in prompt demand when it appears in December for delivery.

The Bulletin has had submitted to it for examination about 200 photographs already, and expects to have others submitted.

The letterpress and the illustrations will represent the best part of the anniversary celebration, and the book will be prized for its accuracy and value by Norwich people everywhere.

Order books on the coupon to be found in The Bulletin's advertising columns.

**LABOR DAY.**  
Here in Connecticut, Labor day is just getting out of its teens. It was made a legal holiday in 1899, and is now to witness its 20th celebration. The idea originated in New York, and the observance of the day was legalized in New York, Massachusetts, Colorado and Oregon two years earlier.

Labor day is so near the human heart that it ranks only second to the anniversary of the birthday of the nation, and if not characterized by as much noise, it is celebrated with equal sincerity. It is a day for quiet recreation and the masses turn it to rest and amusement in many ways. The spirit of the day is for a general good time and the large attendance at the public parks, and the fields of sport and the crowds which patronize the trolley shows that the working people are alive to the day and every pleasure it affords.

May all of the workers of eastern Connecticut find joy and pleasure in the attractions and the inviting spots of the countryside today.

**THE AGRICULTURAL FAIR.**  
The Connecticut Farmer recognizes the agricultural fair as a great educator—not only as a place of exhibits but also as the annual exchange of thoughts with regard to past successes and future experiments. The farmer says: "No farmer can afford to forego the pleasure of attending an agricultural fair, and taking his entire family with him. We have known of farmers before, now who frowned on the idea of fairs, and not only refrained from attending, but doubted the tasks of their families in order to keep them from attending. It is needless to add that such farmers never make extensive conquests in the field of improving agricultural conditions. Make it a point to attend as many fairs as possible and go in a receptive frame of mind, in order to pick up and carry home as many useful ideas as present themselves. Look upon the fair as an agricultural school."

This is wholesome advice. The county fair is the great agricultural festival of the year, and it is worth to the agriculturists all that it costs.

When Labor day was first seriously spoken of, it was taken as a joke by the politicians, but they realized that it must be made a substantial thing, later.

Dr. Cook and his two Eskimoes form the first trio to sit down before the North pole for two whole days.

The magnetic pole has been located several times, but no one claims to ever have had his hand upon it.

## DR. COOK'S RECOGNITION.

Dr. Cook is receiving high recognition and deserved honors regardless of the people who from prejudice or personal motives are trying to impress the public that he is a fakir. Looking the field over, the doctor has no reason to complain, for he has the leading explorers and geographical societies with him, and the confidence shown in his statements is enough to satisfy the most ambitious explorer. England is slow to join in the applause, and her cautious habits account well enough for this. The English are like the Missourians, they must be shown. In the interviews with newspaper men, Dr. Cook has conducted himself well. He complains of their inquisitiveness, but he tells well of his well-balanced mind. He didn't carve his name on the pole or bring it back with him, but he sat by it two days taking observations, and he has them to show as evidence of his presence there. The next man to attain the honor can compare them.

## WHY THE STATE POLICE LIVE.

The state police is not popular, and it never will be so long as it is efficient. There is nothing making enemies for a protective force faster than its efficiency.

The state police last year investigated 634 cases and made 316 prosecutions—one for every working day in the year. The department received \$24,899.22 from the state treasurer, which was expended as follows: For salaries \$12,422; for traveling expenses, \$6,206.61; paid to deputy sheriffs, \$5,019.15; and for office expenses, \$1,251.46. The amount paid to the state treasurer by the department was \$7,951.69, and the amount paid or payable to the state in cases disposed of in the superior court and in the court of common pleas, is \$2,013, making a total of \$9,964.69.

With a record such as this, the force has no reason to fear its enemies. The average man is not those who sympathize with the element which has no respect for law, and they fail because of their recognized antagonism to law and order.

## HORSELESS FIRE ENGINES.

The horseless fire engine is coming because it is more efficient and economical than the horse-drawn system. They have just been trying an auto fire engine at Baltimore in the presence of 2,000 spectators and there is no doubt that the auto's ability to get there first. Chief Horton is no blind enthusiast. He said with reference to the demonstration, that "the trial of a single outfit will serve to demonstrate the capabilities of the new style of apparatus in actual emergencies. It will not do to dismiss the horse from the fire department service without being positively certain that he is outclassed."

While the horseless engine is to be the dependence of the future, he still believes in "going slow and keeping in the middle of the road."

## EDITORIAL NOTES.

The American flag buried in a metallic tube at the North pole is not likely to be unfurled right away.

For the first time in thirty-nine years not an inch of rain fell in Baltimore during the month of July.

In Tennessee they have invented an odorless drink for the men who go out of the theater between acts to see a man.

It has to be admitted that if the Lusitania is the fastest ship afloat she is not by any means the most comfortable.

The thirteen thousand square miles located near the pole by Dr. Cook are not likely to be sought for settlement right away.

The Wrights do not disguise the fact that they have a very poor opinion of Count Zeppelin's monster passenger balloon.

Mrs. Cook, who is able to maintain silence, is a Jersey girl, and by her power reflects credit upon all American womanhood.

Mr. Rockefeller says that his one purpose in life is to make money. He better learn to let go of some things here.

The aeroplanes do not have to agitate the public mind. Every road is a good read with them when once they are off.

Two months of cattle shows will claim the attention of Governor Hughes this fall. He is in the premium class, all right.

Happy thought for today: It is not well to take too much stock in anything. See what the Standard Oil has brought to Rockefeller.

Dr. Cook says that he has had enough—the finding of the North pole satisfies him. It is not every man who knows when he is satisfied.

Swinging a six-pound sledge-hammer to correct a weak stomach and promote a healthy appetite is never likely to be popular with the rich.

There appears to be nothing about the North pole worth claiming except the honor of having found it, and this is denied to the first claimant.

To end his big shooting in great shape it is now suggested that Roosevelt immediately upon his return must go to Niagara and shoot the rapids.

Two Barrels of Gumdrops. The more we learn of the preparations for the Cook-Brady expedition, the more complete it appears to have been. For instance, two barrels of gumdrops were taken along, for the express purpose of calming the Eskimoes. The natives of the far north have a sweet tooth, and many of them would travel thirty miles, according to Mr. Brady, to obtain one.

Extremely acceptable to these human beings who have been placed by an all-wise but mysterious destiny thousands of miles from the nearest sugar cane plantation. Is it not now in order for some philanthropic society to attend to the assuagement of their poverty? Why not have an Eskimo Sunday in the churches every year and take up a collection to purchase them a cargo of sweets—sugar, molasses, candy and the like? The idea is extremely commendable.

Farlington.—It is announced at Hartford that on Wednesday the Farmington Street Railway company will be taken over by the Connecticut company, the trolley operating company of the New York, New Haven and Hartford railroad.

## Woman in Life and in the Kitchen

### CONCERNING WOMEN.

At one family table each member makes it the duty of the occasion to remember every interesting and funny thing that he has heard during the day, and the father and mother are not exempt, either.

Miss Adelaide Smith, a native of Boone, Iowa, has been elected to the chair of mathematics at the University of California at Berkeley. She formerly occupied the chair of mathematics at the University of Johannesburg, in South Africa.

A London pamphlet issued by the central bureau for the employment of women says that there is a fortune in preparing food according to medical formula, which is at once palatable to the taste and within the limits of the purse.

Emma Goldman and Marie Corelli are two women who have announced themselves as opposed to woman suffrage. Neither thinks that women are benefited by being allowed to vote, although the ways of reasoning are different by which they arrive at the same conclusion.

The first leaves of the great tea plantations in China are always reserved for the imperial use, and a great pleasure over her tea. She used a curious flower mixture to add to the delicacy of its flavor, which consisted of dried honeyuckles and jasmine blossoms.

### NEEDLEWORK SUGGESTIONS.

Paris Transfer Pattern No. 8059.

Design in braiding to be transferred to linen, lawn, pique, or any wash material, for collar and cuffs, used to add a dainty finish to a coat. Soutache, soutache, or any narrow cotton or linen braid is used by simply following the lines of the design and attaching it to the material by fine stitches.

The dots are done in white with white or colored mercerized cotton, and the edge is buttonhole, after being heavily padded, before cutting out. If silk or satin is used for the making of the set, silk braid and heavy silk floss are the materials required for the development.

Price of pattern, 10 cents. Order through the Bulletin Company, Pattern Dept., Norwich, Conn.

Paris Transfer Pattern No. 8059.

Design 18x18 inches for 12-inch sofa pillow, to be worked in Wallachian and eyelet embroidery, and transferred to linen, denim, burlap, lawn, rayon silk, ticking, art fabric, satin, messaline, silk or any pillow material, the design worked with heavy silk floss or mercerized cotton, according to the material used in its development. On the large design at each corner is worked in solid embroidery it should be padded so that it stands out in relief and works in a contrasting color from the rest of the pillow. If desired the edge may be finished with a silk or cotton cord, or left plain, as illustrated.

Price of pattern, 10 cents. Order through the Bulletin Company, Pattern Dept., Norwich, Conn.

## HEALTH AND BEAUTY.

Soaking the feet night and morning in hot water for five minutes at least will do much toward relieving the pain. A mixture of alum, rock salt and borax in even quantities will be helpful in extreme cases.

A German woman who suffered from neuralgia was cured by fasting, and hence in her opinion it is food and not money that is the root of all evil. Medical authorities are already countenancing hunger cures for different maladies.

A pleasant and refreshing mouth wash may be formed by mixing in a pint of distilled or otherwise pure water two teaspoonfuls of prepared borax and a teaspoonful of camphor. Keep it tightly corked and shake well before using.

Many persons find that a little peroxide of hydrogen brushed over the skin immediately after freckles appear has a marvelous power of dispelling them. One should, however, vary this treatment by applying some fatty cream for the drug tends to wither the skin, and some skins it irritates greatly.

Many women who personally take care of their own homes, attending to the general work, complain because the work destroys the beauty of their hands. This is not necessary, because one can wear gum gloves while doing much of the work. Do not get a pair that fits too closely, for the hands perspire and naturally the gum clings unless the gloves are a trifle large. One can soon get accustomed to them.

HOW TO SERVE OYSTERS.

Oysters with Bacon. Clean oysters, wash each in a thin slice of bacon and fasten with wooden toothpicks or small wooden skewers. Put in a wire broiler, or toast over a dripping pan and bake in a hot oven until bacon is crisp and brown, turning broiler once during the cooking.

Oyster Soup. Strain all the liquor from two quarts of oysters, add to it one cupful of hot water and let it come to a boil. Season to taste and add two tablespoonfuls of butter and the oysters; cook until the edges of the oysters begin to curl. This is not necessary, because one can wear gum gloves while doing much of the work. Do not get a pair that fits too closely, for the hands perspire and naturally the gum clings unless the gloves are a trifle large. One can soon get accustomed to them.

Oyster Omelet. Add to a half cupful of cream six eggs beaten very light, season with salt and pepper and pour into a frying pan with a tablespoonful of butter. Drop in a dozen large oysters chopped fine with parsley and fry until a light brown. Double over and serve at once on a hot platter.

Oyster Shortcake. Make a rich biscuit—dough the same as for tea biscuit—but steam over hot water instead of baking. Split open and spread with hot butter and creamed oysters to which beaten eggs have been added just before they are removed from the fire. Serve at once.

Tomato Pie. Take ripe tomatoes, wash, peel and cut in thin slices; fill a pie plate lined with good paste with them; sprinkle well with sugar and sift a little cinnamon and grated nutmeg over them; add two teaspoonfuls of vinegar and one of lemon essence; cover with crust and bake.

French Coffee. Put two teaspoonfuls of coffee in the top of a French coffee pot; pour on three cups of boiling water, one cup at a time; keep hot and not boil (over the teakettle or in a pan of hot water). When all the water has been used pour it through again. Serve with scalded milk and cream.

Cold Slaw. Chop fine one pint of cabbage. Put on to boil one-half pint of vinegar. When it boils put in the following ingredients mixed together: One-half cup of sugar, one tablespoonful of flour, one egg, small piece of butter, one teaspoonful of mustard. When it has boiled five minutes, stir in the cabbage, sprinkle with salt, stir well and set away to cool.

Norwood Rolls. Sift one quart of flour, two heaping teaspoonfuls of dry yeast powder, two tablespoonfuls of sugar, one teaspoonful of salt in your mixing bowl, then mix in about three-quarters of a quart of sweet milk. Do not have too soft. Drop from a tablespoon into hot lard and fry lightly on doughnuts. Roll in powdered sugar if liked very sweet.
